

POET AG

The POET AG, founded 1993 in Karlsruhe, is a leading provider of collaborative e-business for the exchange of large and diverse ranges of products. POET operates under the motto: coordinated processes make e-Business between companies successfully. The POET AG is nationally and internationally known as a reliable provider for document exchange in e-procurement and e-commerce solutions.

We deliver the right product information to the right spot at the right time. We help our customers manage their manifold and huge range of products in the best possible way.

We are responsible for the quality and topicality of product data and business documents between many 1000 suppliers and customers and realize and maintain customized order management systems. Large purchasing organizations of leading companies in industry and trade as well as large and small service companies use our e-business solutions.

e-business success through collaboration and innovation

We connect with our collaborative software solutions for use in e-commerce and e-procurement, people, products and services. POET's software solutions and services save money and time in purchase and sales by optimizing complete eBusiness processes.

POET's solutions save time and money in e-business processes between companies, both in procurement and sales.

Being a market leader in the segment of catalog management for the B2B online trade we always think a step ahead, because ever evolving markets are the only constant thing. We never are content with the current state, but keep working now on tomorrow's software solutions and services. Together with our customers to develop new ideas for e-Business. As the innovation leader in the industry POET AG is constantly committed to groundbreaking projects with academic institutions both at home and abroad.
